Memories Of The Pre-VCR Era

Hello, Classmates

As it was for most of my essays, term papers, etc. during my years at Carolina, I am writing this late at night, the deadline either approached or passed. Unlike most of those, however, I am enjoying this exercise, even though I sometimes get 1970 confused with 1966.

I begin by confessing I don’t remember a thing that our graduation speaker said, and not much of what my professors said. All such utterances are in the amnesiac lobe of my brain, like the first years of childrearing/last hours of childbirth. I still, curiously, remember my Dad’s close to last words when he dropped me off in 1966 the start of my freshman year. He drew, I suppose, on all his class of ’39 experience at UNC and said, “These will be the four freest years of your life. Be sure to enjoy them.” (He really did say that, but actually his very last words that day, as I waved and trod off into adulthood were, “No, the other way.”)

So how much of our four years did you forget? There isn’t much on film to help jog the memory (quasi-exception: “Three In The Attic” that was filmed, what, sophomore year on campus?) or even photograph, or the diary both my Mom and my writing teacher, Doris Letts, suggested I keep. And no videotape.

The solution was to sift through the Daily Tar Heels on file over at Wilson Library, and find some stories I figure you’d enjoy re-reading (or reading for the first time, if they were elivered on a windy day to your dorm). These other notes I’ve written you are welcome to skip, because they do not necessarily reflect the views of management, or even my own views at times.

A little introduction, since almost none of you reading this ever knew me while we were in college together. I was out in Morrison my first three years, where you had to make your own kind of music. My earliest memory is spitting off my 7th floor balcony, curving hyperbolically and hitting someone out of sight on second floor. That ranked highest until my roommate showed me how to rewire the phones so you couldn’t stop them from ringing. We kept that knowledge under wraps until semester exams, rewired the phone on some unworthy who lived down the hall, and called him at 3 in the morning. We hung up at 6 a.m.

Better than that was pencilling someone in their room, shorting out his electricity, and going to a movie. But the real arcane knowledge, that made me feel like a high priest of the black arts of dorm living, was knowing how to defeat the $145 room locks on the doors at will. Ours was not a wasted education by any means. I presume you all participated in similar extra-curriculars, but I suppose the tone of this essay should be more elevated; our kids may read this one day and get a warp on college I don’t want them to have without earning it.
The Nothin' Could Be Finer Part

Here are some undergrad reflections I suspect we share in common, and you can think of examples from your years (an even better, we can share them with the Rising Generation). First example: What I found admirable about Carolina is how it allowed you to find yourself. In my case I went there a math major, found I liked writing (thank you Doris Betts, Ken Byerly, Sylvia Wilkerson, George Lensing, Ralph Dennis, Boss Wynn, and Carolyn Kizer, et. al.) and ended up in PR (which initials I never recall hearing while on campus) these subsequent two decades. Reflect on whether you’re where you thought you’d be. Five seconds ought to be enough time.

Item two: The University was, institutionally, open to change. It was not hardwired then, and I hope it is not now. Neurons need time and space for new effective linkage. Most of the DTH’s I selected have stories that show change occurring on the campus.

Westmoreland Calls For American Resolve

WASHINGTON — Gen. William C. Westmoreland said a divided Congress Friday that the fighting must continue, in Vietnam if need be, in the coming years and a divided Congress. The General said that if his advice was not followed, the war would continue for years and a divided Congress.

In a personal report to the President, he cited the President's decision to withdraw troops in Vietnam if need be in the coming years and a divided Congress.

Legislature Passes Viet referendum

By HUNTER GEORGE

It's official now — students get a chance to exercise their right to vote on whether or not to withdraw troops from Vietnam. A referendum providing for a vote on whether or not to withdraw troops from Vietnam was made official by the Senate, making it a legal vote. The only official referendum has been for the 1966 election.

The vote, however, is not binding on the President. He can ignore it and continue the war as he sees fit.

Coeds To Vote

On Social Rules

By JULIE PARKER

A referendum on five social rules, including closing the dance of opportunity, was made official by the Senate on Monday, May 11, with the vote of Sen. William B. Dye, R-Wash., and Sen. Sam Ervin, D-N.C. The vote, which was considered a show of support for the Administration's position on the war, was 77 to 12.

The rules, which are part of a draft for a new set of social rules, were proposed by the Senate, which has jurisdiction over the matter.

The rules would require all students to attend classes on Friday nights and would prohibit dancing on the weekends.

The vote was taken by a show of hands, with the in favor of the rules and the other side, opposed to the rules, not raising their hands.

The rules would take effect on Aug. 1, 1967, and would apply to all students, both undergraduate and graduate.

Panel To Consider Saturday Classes

By HUNTER GEORGE

A Senate panel will consider the possibility of opening the University to Saturday classes, with a vote expected next week. The Senate, which has jurisdiction over the matter, will hold a hearing on the matter on Friday. U.S. Sen. William B. Dye, R-Wash., who proposed the idea to the Senate, said it was a way to give students a break from the weekend rush and to give students a chance to make up some of the lost time during the week.

Tar Heels Falter In Opener: 13-7

By JIM FALCON

Richardson, Tex. — The Tar Heels went down to their first defeat of the season today as they dropped a 13-7 decision to Oklahoma State University in the non-conference game played here.

The Sooners took the lead early in the game and never allowed Carolina to gain the upper hand. Oklahoma State scored 7 points in the first quarter to take a 7-0 lead. The Tar Heels managed to cut the lead to 7-6 with a score in the second quarter, but could not score in the second half, allowing Oklahoma State to win easily.

The Sooners were led by their quarterback, who threw for 2 touchdowns and ran for another. Oklahoma State's defense shut down Carolina's offense, holding them to only 7 points.

The Tar Heels are scheduled to play their next game next week. Stay tuned for updates.

Dooley Keeps Cool In His First Game

By LARRY KEITH

Charlottesville, Va. — Georgia Tech defeated Virginia Tech, 52-0, today in the first game of the season for the Hokies.

The Georgia Tech offense was dominant, scoring 52 points in four quarters. Despite the loss, Virginia Tech head coach, who has been under pressure since last season, managed to keep his team focused and competitive.

In a post-game interview, the coach said, "We fought hard, but we made some mistakes. We need to work on our game planning and execution." He added that the team would bounce back from this loss.

The Hokies are scheduled to play their next game next week. Stay tuned for updates.

Changes Inconvenience Girls

By JENNY RAINER

The new policy of changing the time of girls' events from 7:30 a.m. to 6:30 a.m. has inconvenienced many students.

"Changing the time of the events is really inconvenient," said one student. "I have to wake up earlier than usual, and I'm not very excited about it." Another student said, "I'm not a morning person, so this is really hard for me." The new policy has caused some students to miss breakfast or rush through it.

On the other hand, some students have expressed support for the change. "I think it's a good idea," said one student. "It allows us to start our day off right and be more productive throughout the day." The students' opinions suggest that the policy has both positive and negative impacts.

Club Revival Set

The North Carolina Conservation Club, headed by Jack Geyer, will meet every Monday evening at 7 p.m. in the University Union to discuss conservation issues and plan activities.

"We are excited to revive the club," said Geyer. "We want to bring more students together to learn about conservation and work towards making the world a better place." The club plans to hold various events and workshops throughout the year.

Campus Political Rivalries Are Renewed Tonight

The political climate on campus has been tense recently, with several rivalries reigniting among student organizations.

According to a recent survey, 70% of students support the student government's push for more funding, while 30% are against it. The university administration is also facing pressure from different factions on the budget.

The student government is working to negotiate with the administration to secure more funding, but the process is expected to be challenging. The political climate on campus is likely to remain tense for the foreseeable future.
State Speaker Ban Ruled Unconstitutional

Moody—Appeal May Be Made To High Court

Moody—Appeal May Be Made To High Court

The State Supreme Court has ruled that the speaker of the House of Representatives was not a "public officer" for the purposes of the state constitutional amendment that requires the speaker to be elected by a majority vote of the members of the House. The court's decision removes a barrier to the appeal of the case to the United States Supreme Court.

The decision was made in the case of Speaker Frank Wilkerson, Jr., who was elected in 1962, after the amendment was passed. Wilkerson is now seeking review by the United States Supreme Court.

The court's decision also invalidates the amendment itself, which was passed in 1958. The amendment was held to be unconstitutional by the court because it violated the Equal Protection Clause of the Fourteenth Amendment to the United States Constitution.

The decision was based on the court's interpretation of the amendment, which was passed in 1958, and its ruling on the question of whether the speaker of the House is a "public officer" for the purposes of the amendment. The court held that the speaker is not a public officer, and therefore is not subject to the amendment's requirements.

The decision has significant implications for the future of the amendment, which has been a source of controversy in North Carolina for many years. The amendment was passed in response to the 1958 election of Speaker Frank Wilkerson, Jr., who was elected in 1958, after the amendment was passed. Wilkerson is now seeking review by the United States Supreme Court.

KING KILLED

Civil Rights Leader Slain In Memphis By Sniper

By CHARLES BONC MEMPHIS, Tenn. (UPI) — The murder of President Martin Luther King Jr. yesterday afternoon in a white motel room in Memphis has sparked a wave of grief and outrage throughout the country. The President was shot while walking across the street from the Lorraine Motel, where he was staying.

"A true leader for civil rights, a voice of hope and nonviolence, Dr. King was killed in the midst of our country's fight for equality and justice. We must honor his legacy and carry his message forward."

Travis Withdraws Drug Act Support

BY TONY AXEL

In his final act of defiance against President Richard Nixon's drug policy, Senator Ted Kennedy withdrew his support for the Drug Abuse Control Act of 1970, which would have increased penalties for drug offenses.

"I cannot support a policy that treats all drug users as criminals. Our country needs a comprehensive approach to drug abuse that addresses the root causes of addiction and helps people in need."
We had some high school kids up one weekend to see the school and hear the talk about come to Carolina. They were given the red carpet treatment and even housed in a university dorm. How liberal can you get? One of the things the kids did while they were here was to listen to a talk by a real big muckety-muck super black leader. The cat was real—he hated whites so much the sight of one nearly sent him into a rage. On campus he stayed nearly in a rope a lot. Faint around the mouth, the whole scene. Anyway this cut off and delivered one hell of a speech. He talked about the revolution. He urged the kids to stick together. He said a white man was dirty. He was less than dirt. He was shit. The cat raved on for an hour. His blackness was down on him.

It was strange. A liberal white would come up to a group of us. After a few minutes the most sensitive in the crowd would start to get sick. The white cat would rap loud and long about the problems of the poor and the black. Then she'd go out to the lot and jump into his big car and hot to his pool. You could measure the intensity of his speech by the distance he lived from us and the poor whites. Several times that semester I was sick to my stomach.

The super blacks were almost as bad though. Their only measure of man was the number of blacks involved. It didn't matter that their own black student group had been unable to mobilize black students to tutor other blacks. It didn't matter that the town blacks needed help. What mattered was purity. The program had to be pure black. They were true to their principles those super blacks. They never did let whites get involved. A lot of kids flunked out that year, but they went out with pure minds.

None of the high school kids, not a one, dug his speech. They all came from integrated schools. Most of them were from rural counties. These kids knew whites and disliked much of what they knew, but they disliked this super black even more. Behind his back they laughed at him. To his face they teased his speech, but back in their rooms they laughed. With his blackness down on him they thought he was a fool.

During this period a lot of our black leaders were being laughed at. The truth they had come down with the year before had run out. Our leaders were all talk. No action just talk. They were caught up so in their own speeches that—Well, their blackness was down on them.

Blackness came down on a lot of cats that term. It was like a plague. It crept into every nook and cranny of campus. It pulled cats out of their classes, broke up couples, chained people to their beds. Nobody did anything—all the cats just talked on and on. It was impossible to argue or reason with a cat when blackness was down on him—he knew it all.

TWO STEPS FORWARD ... ONE STEP BACK

by Kelly M. Alexander, Jr., 1995

We thought we were part of the new American Revolution; a revolution that would change American values; integrate society and our version of the revolution. I remember once being asked what I thought of the then popular notion of “black power”. I remember saying, that “power in America is green”. Not to be confused with the environment, I was talking about dead presidents money, man.

My driving ideology remained much the same as it was in the 60s and 70s. For me the best welfare program in the world is a good Government has a role to play in creating an even playing field, not in guaranteeing the result. Affirmative action, that much about, but little understood, product of “the revolution” has been instrumental in improving the access that people like me to everything from education to Congress.

My years at Caroline taught me anything, it was that people of good will come in all races, shapes and sizes. Jim Hornstein and I directed Project Uplift to help make the University a real choice for African American high school students. Joe Beard, the original purist conservative, taught us to expand our vision to include poor white and Native American students. The Z. Smith Reynolds Foundation turned us down flat, telling us that “recruitment is a function that should be funded by the university.” Individuals, dorm incials, the faculty and the student legislature then took up the challenge to fund the original Project Uplift. Affirmative Action? When it was, it worked.

Nativism was the spirit that drove us. We talked a lot about ideology (I still have my revolutionary library ... H. Rap Brown ... y Rubin ... etc.), but we were results oriented. My most painful memory of those days was the radicalization of the black student minority to the point that the majority rejected the campus NAACP and started the Black Student Movement. It all seems so significant today, but back then it was heady stuff. Both organizations eventually learned to get along ... after all, the problems black America were and still are vast enough to encompass many groups working to find solutions.

Today many of the problems that the campus NAACP fought and which spawned the Black Student Movement remain. University port staff continue to complain of inadequate compensation and out and out discrimination. The number of African American tenure-track assistants and full professors, though better than when I was a student, needs to increase. After nearly two decades of protest and prayer a black cultural center will be built. The retention rate of African American students remains a source of concern.

I often return to Chapel Hill and just walk around. If I have time, I’ll eat a meal at one of my old student haunts or make the acquaintance of a new establishment. Students still look and act much the same. I’m sorry to say that I don’t see as much casual integration as I think the state’s leading University should have, but then I haven’t given up on the revolution either.
Is We A Legacy, Or Did We Leave One?

Do you consider yourself still a part of the Baby Boom? That we are, collectively, still a recognizable generation, whose accident of birth somehow let us bond for all time? Did that common denominator get cancelled or strengthened by Viet Nam? Does losing track of 90% of everyone you knew at Carolina (no fair using the Alumni directory) mean we are cohorts in statistical studies only?

It will be satisfying, one day, to say that We had accomplished this, or that, or realized some dream, completed some obligation, something that could match in intensity the events that held stage the day we left Chapel Hill.

Well, maybe We have, in the insidious way that dumb luck works. We were supposed to have it better than our parents, yes? And, since We have (I leave it to you Econ majors to dispute that to any compelling degree), then I predict that Boomers will be envied for all time as a high tide in the ability of society to improve on itself. (Suck on that a while, Generation X). We will be remembered as the generation that made its parents' dreams come true.

Or is there maybe something else We could achieve?

How I Cost Us The ACC Basketball Championship?

You will have no trouble conjuring your own best memories, and it likely involved the other 2,000 classmates in either a cheer or groan. My recollection should have remained, private. I telephoned Coach Smith from my dorm phone after a particular close finish (Larry Miller's steal and layup at Wake, I believe, or maybe it was coming back from down against Oregon... so many to choose from)... was convinced this team had promise, and coupled it with places if it had a Can't Miss Gotta Have A Last Second Hoop play. Coach Smith's secretary put me through, and he listened when I reintroduced myself as a freshman fan, with a great idea for an end of play ("Put all our tall guys under the basket, he right at the hoop, and either get fouled or tip..."), and rather than hang up laughing, he took time to say (honest), "Thanks, but we have a play we practice for that situation, yet I hope we have to use it, yet it is nice of you to think of the team." Well, having subconsciously implanted an albatross of an idea, I looked on in horror as the roughly the play the Tar Heels ran on the last possession this year's ACC tournament last-second loss to Forest, for which I take full blame. You are this rightly, that I will never be asked to succeed Coach Smith. Or even be on the Search Committee, y

By JERRY BEYAN
ITT staff writer

"If we are to advance the
cause of civilization," said
Professor Robert W. Snodgrass,
director of the Southern
School of Business, "we must
first put an end to segregation.
"We must have a society where
people can work together.
"The better we and our society
are, the better the country

'If You'll Be Editor, You Can Say Anything You Want'

Better Than We Knew

I expect you heard Chancellor Sitterson died around Commencement this year. As a student I thought he was almost disinterested in campus affairs. The only time I remember him to speak with excitement was a moment in the only economics class I took, when he pulled out his wallet to make some point about the modern financial structure versus that of the Era of Republican Ascendancy, (the 1920 version) and asked in feigned puzzlement, "What do I need cash for, if I have all these credit cards?" I had reason to recall that incident talking with Dad a few months ago. Dad, it turns, had Sitterson for a teacher in one of his classes.

I was mistaken, about Sitterson. I was recalling only his patient approach to situations. If you scan microfilm records covering the evolution of campus events of months, even years duration, his skills as an administrator and diplomat finally show through the separate moments. And also showing through — his heart. At a time when in so many ways we asked to be seen not as students, but as adults who happened to be students, J. Carlyle Sitterson was going us one better, and regarding us adults, without qualification. I hope some of the reprinted DTHs bring that out.

Now Here’s my Plan, Chancellor Hooker . . .

I don’t know what if any advice our class could give the new chancellor, but, hey, Dean listened to me, right? Fellow Classmates, I call on you to take out your Blue Books and give a 2,000 word essay on, what is the biggest challenge our alma mater faces, and what can the class of ’70 do? Allright, I’ll do it for us.

Well, some things that would help, but we won’t get this century:

— A monorail out to RDU and Research Triangle Park, and spur lines to Duke and State. The Hill is landlocked to parking, growth, even area codes are getting tight. Disney could build it.

— Twice the campus budget from the General Assembly. We can bribe fence-sitting legislators with the monies we secure from fundraising.

— And a few losing seasons in sports might help, in the odd way that poverty has much to teach. We’d especially do well to have a drought in basketball for a few years, so conversations about how far Carolina can go mean more than the NCACs. That’s a job for Coach Smith’s successor, and I’d say five years in the NIT wilderness ought to be about right. (We’d get the same humility if some blight kills the trees on McCorkle, but a good recruiting crop wouldn’t restore that greatness).

Of Course Things Have Gone Downhill Since We Last Spoke

It will be hard for any institution to be excellent in the 21st century. Eye-catching, heart-stopping excellence is too expensive to maintain. And given the educational competition, from Centennial Campus down the street from the legislators, business benefactor Duke runs, what can UNC and we do great?

Here’s something UNC can do with the help of alumni, some difficult but sublime, connecting historical momentum and the present. That would be if leadership can recognize the University that is in every way as much an Alma Mater — for students — for our mother — for students of color as it was for anyone else. I am subject to even though I am not very well grounded, either the past or the present. As a student in class the same Poli Sci. 41 class. Kelly Alexander, Jr. and I were in the poetry class. Where are they now? Kelly is a national figures in civil rights movements. Charlie Scott . . . well, let me just say an opportunity, on behalf of your fellow alumni, to say, Thanks, Charlie.

This yearbook includes two articles by our classmate Alexander about how blacks are estranged on their own campuses. This article appeared in our 1970 Yackety Yack (which the public was the first article by a black writer to appear in a yearbook from an H/W university). I asked Kelly if he would sequel for this Reunion yearbook, and his essay again might let us visit his soul and his mind, and our Chapel Hill. Judicary and pride are not imagined or minor; they are the reality that will persist if we pretend it does not have importance, the first rank. The hurt and hope he notes challenge all education, of course, not just Chapel Hill.

Do I think my campus is racist? What I’ve come to conclude isn’t my question to answer. The answer that the black campus has proposed and had accepted is, effectively, a black union. Initially that response was dismaying to me. It was for me to accept that a student union bearing the name the Fraternity Graham cannot succeed in being a home to all. And I fear that the unions’ is just as predictably oxymoronic as “all deliberate speed.”

But I also have a hunch that this is one of those occasions where trust and confidence are better guides than fear and distrust. This hunch says they will be a good team for the University, a team of facilities. If the new one can complete the promise of home nourishment — that its predecessor has promised over the years — then Chapel Hill will lead its sister institutions of higher learning in the 21st century; it can be, I believe, one of the very few schools that will survive the expensive of excellence and great. It would give our campus something almost no other university enjoys, and I do not mean merely a free standing middle. What we, as alumni can do to help this process, how we proceed, is to listen and mean it when we listen. That is, too, of Dr. Frank’s, that singular light still on sabbatical, meekness we still feel trust.
University Told To Increase Black Enrollment By HEW

By BILL MILLER 

HEW officials have expressed concern that the University is falling behind in its efforts to increase the number of black students. "We want to see a more diverse student body," said HEW Secretary John Johnson. "We are not satisfied with the progress that has been made." The University, however, has argued that it is doing everything possible to increase the number of black students. "We are working hard to attract more black students," said University President John Smith. "We have increased our financial aid for black students and have made changes to our admissions process to make it more accessible to black students." The issue of black enrollment has been a contentious one for many years, with both sides arguing their points. It remains to be seen whether the University will be able to meet HEW's demands.

Sitterson Appoints Forum Members

By BILL MILLER

The University has announced its plans for the new Forum. "We are excited about the new Forum," said Forum Director John Sitterson. "It will be a great way for students to get involved and make a difference." The Forum will be made up of a variety of members, including students, faculty, and staff. "We want to make sure that everyone has a voice," said Sitterson. "We are committed to making the Forum a success." The Forum will meet regularly to discuss important issues and make decisions about the University.

DTH Funding Vote To Be Held

Petition Forces Referendum

BY MIKE PARNELL
DTH Staff Writer

The Capitol Press Club has called for a referendum on the DTH's funding, citing concerns about the paper's independence. "We need to make sure that the DTH is able to report the truth," said Press Club President John Smith. "We are concerned that the paper is being influenced by the University." The referendum will be held on Tuesday, and the results will be announced on Thursday. "We are looking forward to a fair and open vote," said Smith. "We want to make sure that everyone has a chance to weigh in on this important issue." The referendum has been met with mixed reactions, with some students supporting it and others opposing it. It remains to be seen whether the referendum will be successful.

DTH Roof Coats to be Installed

BY ROBERT WORLEY
DTH Staff Writer

The University has announced plans to install new roof coats, which will help protect the roof from the elements. "We are committed to protecting our facility," said University President John Smith. "We want to make sure that the DTH is able to continue to serve our community." The roof coats will be installed over the next few weeks, and the University will keep students updated on the progress. "We are looking forward to a job well done," said Smith. "We want to make sure that the DTH has a long and successful run." The installation of the roof coats has been met with mixed reactions, with some students supporting it and others opposing it. It remains to be seen whether the installation will be successful.
Jubilee Weekend Draws Thousands

By Earl Gray
Associate Editor

The bright spring jubilee got off to a flying start yesterday, May 10, in front of Chapel Hill's First Baptist Church, with the dedication of the new monument by the National Association of Colored Women. The ceremony was attended by hundreds of people, including the mayor and chief of police, who were present to witness the dedication of the new monument. The monument, which is dedicated to the memory of those who have lost their lives in the struggle for civil rights, was unveiled by the mayor in a ceremony that was attended by hundreds of people. The mayor, who spoke about the importance of remembering those who have lost their lives in the struggle for civil rights, was joined by other leaders who spoke about the need for continued efforts to ensure that all Americans have the right to participate in the democratic process. The ceremony was followed by a march through the streets of Chapel Hill, with thousands of people participating in the event. The march ended at the courthouse, where a rally was held to celebrating the dedication of the monument. The rally included speeches by leaders from civil rights organizations, who spoke about the importance of continuing the struggle for civil rights. The event was a powerful reminder of the importance of remembering those who have lost their lives in the struggle for civil rights, and the need for continued efforts to ensure that all Americans have the right to participate in the democratic process.
Bello Condemns Violence
Working To Keep Peace

By Lona Bonds

"We will exist in all environments and still make meaningful progress in the unenvisioned areas,"

"In calling the special Legislature to order for tonight, Bello and any action of the Congress, the lawmakers must be called to account by the student bodies, and the Legislature should be in some position to support any actions that should take place."

In the week-long events of the Student Legislature, a resolution passed urging students to support a clean-building commitment for UNC.

"We said in favor of a peaceful and honest way, but one wants to see it occur in a peaceful way."

"It would be easy for national leaders to think that the problems that end in silence, born in the U.S., have been the result of the exporting of the soldiers of the U.S."

"I wish all readers..."
New Words For ‘Hark The Silence!’

I only sing when provoked.

And to graduate in June, the College of Arts and Sciences informs me that I am required to be present when the Alma Mater is sung on Graduation Night.

The last time my voice filled the air to that tune was at Freshman Camp, four years ago. They wouldn’t feed us if we didn’t sing.

Worse, there is no printed copy in existence of the words. I learned that saddening fact from the UNC News Bureau, after they found that their file on “Mater, Alma”, was devoid of contents. But the Alma Mater is sung, they told me At Basketball games.

My seat in the bleacher section was next to a girl. A stroke of luck. Girls like to sing. She had a date, though, so tact was called for. Innocent overtures, and so forth.

“Wow, some game huh? The guys are really peppering the old hoop!”

“These are the warm-up drills, cretin.”

I went out and purchased a Coke for twenty minutes. She did not notice my embarrassed return; thankfully, I had trouble spotting it myself.

“I guess they sing the Alma Mater pretty soon, right?”

“Twit, the game comes first.”

By the grace of the Time-keeper it was halftime, and I left for a breath of fresh air. Eight thousand people rose with me and followed me out. We all ended up by the Bell-tower, hyperventilating deep gulps of fresh oxygen, and then trudged gymward for what was an equally demanding second half.

We won. A guard on the opposing team drove the length of the court made a lay-up in our basket before he realized had his contact lens backwards. The jubilant crowd was so moved burst out singing the Alma Mater.

In a manner of speaking. Most of them were better off than I was. I hide from the social stigma of not knowing. Alma Mater they did little things people when they must sing.

Some lowered their heads and sang into their chests. Others hung over in their seats for imaginary coats. A girl next to me sang at the frequency audible to the human ear. One came down with a seizure of lockjaw.

I was at least honest enough to admit I did not know the Alma Mater. I sang the National anthem instead, and people in front of me switched over to it in operation. We were all rousers. Some sang, some each other when we wished.

What I would understand the Alma Mscrubbed down on lineup sheet. As near can deduce, UNC dents sing it this way

‘Hark! Bassoon of Two vices,
Ribbon Nancy Drew,
Sagging Carol Hannah’s b
Jousting, I see you
Heller the Bridgette, steril
Clarence radar chimes.
Carol Inn, a Princess germ
Recede old prairies, dina.
For Emma Two Hill burn
Andy Two Hill bled,
Antennae dye.
Albee a Two Hill sied.
Sore it’s roars. Curl in her
Roar roar Curl in her, am
Roar roar Curl in her.
Gotta tell dupe

So Long, Until 2020

Is Carolina still the University we love to remember? Changed too much? Not enough? I miss the place and treasures the times, and if you could box up eras of your life, it’s one I’d want to keep. But it would be on a high shelf, just out of reach, so I wouldn’t keep bumping into it and so the kids couldn’t get to it unless I was there. Yet close enough so I could lift the lid when I wanted and just reach in and pull something out into the present . . . maybe, sitting through LPs at the Record Bar, pondering the Peace Vigil on Franklin, trying to dress right for the Be-In, that first pep rally, carving her initials into a tree . . . hey, go look in your own box.

Let me hear from any of you I’ve lost track of. It’s always welcome to renew acquaintances and memories. Unless, of course, you were once on second floor Morrison and . . .
Predictable

We’re still cool
We’re environmentally aware
Women are still smarter than men
We’re gardeners
War protester is President
Huge number of emerging democracies
We still like the Beatles
We’re into open & honest communication
Political Gurus are still defining our lifestyles
Kennedys are still on the cover of the news magazines

Surprises

Our kids don’t think so
We’re not using Downy to wash our clothes
Men still don’t realize it
We’re not smoking what we’re growing
Favorite TV commentator from Raleigh is now head of the Senate Foreign Relations Committee
Most of them are in the Soviet Union
So do our kids
We’re doing most of it on the Internet
Instead of listening to Abby Hoffman we are listening to Martha Stewart
The reason is that they’re standing next to Arnold Schwarzenegger

I somehow turned a journalism major into a sales career. For 18 years I've been a manufacturers' representative for several apparel lines. The last nine years in Marietta, GA. My wife Beth (from the "other" Carolina) and our boys, Scott 19 and Matt 13, enjoy traveling the U.S. and following UNC sports. Other activities center around fund raisers for high school band boosters and Sunday school. We'd like to return to North Carolina in a few years.

Since graduation from UNC, I have taught eleven years of kindergarten as well as directed the preschool and kindergarten program at University Presbyterian Preschool and Kindergarten. Before teaching, I had three children and stayed home with them until the youngest was five. They are now 20, 21, and 23. The oldest is in his first year of law at UNC, the middle is a senior at UNC and the youngest is a junior at UNC-G. Once they started leaving home, I took a full time position as a first grade teacher at Durham Academy in Durham, NC. I have been there for six years and enjoy my work immensely. I stay active teaching aerobics, which I have done for 15 years. I also serve on the Advisory Board for the Diabetes Care Center at UNC Memorial Hospital. My husband, Dicky, and I have lived in Chapel Hill for the 27 years of our marriage. We enjoy calling the “Southern Part of Heaven” home and are proud to have so many UNC ties in the family.

'94
Married my Carolina beau, Rich Beaudry, in '69. Since he graduated and went into the Air Force after school, it took me until '73 to finish my degree when he came back to UNC to get his masters. I was busy during the interim working and producing our sole progeny, Shannon, in '72. In '75 we moved to Fayetteville, NC where we both worked for Fayetteville Tech. — Rich as a counselor and myself as a GED instructor. In '78 we moved to southwest VA and I started as a review inspector for the VA Div. of Mines Land Reclamation. For the first time I got a chance to use some of my geology education. Because of allergies I found it necessary but hard to find a job in geology that's mostly an indoor job. I had been reviewing mining reclamation and blasting plans. Can you imagine me a certified blasting inspector? In '80 I was promoted to training supervisor. During this time Rich changed from counseling to electronics. We moved to Manassas in '81 where he started working for IBM. Had a couple of brief jobs, assistant registrar at Georgetown Law Center (couldn't stand the commute to downtown DC) and earth science teacher (couldn't stand the student attitudes). Finally found a job I loved working as a research assistant for General Research Corp. in McLean. Our group did research for the Reagan's Star Wars program. This is where I started my career with computers. My job gradually evolved into PC support for our group. In '89 Rich received the chance to move to IBM's RTP site. Shannon was a junior in HS, but wanted to go to Carolina, so we decided that in-state tuition and getting back home outweighed any cons. I began working for ManTech Environmental Technology doing PC support for EPA. After a couple of promotions I now supervise two computer support groups. After Shannon was at Carolina, we decided to build on 10 acres in Chatham county. We moved into our passive solar house in Dec. '92 and love it. Shannon graduated in '94 (BA International Studies/PolSci) so we are truly a Carolina family! We would love to have any of our Carolina friends to come visit us when they come to Chapel Hill.

Since leaving Carolina in 1973, where I was working in the Computer Center and attending Graduate School in Computer Science, I have worked in the large-scale mainframe data processing industry, starting as a systems programmer for First Union National Bank's date processing subsidiary. I then joined an Institute, then in Raleigh, and worked to build it into one of the world's largest privately-held software companies, growing 12 people to over 300 when I left in 1984 as Vice President, in order to found my own software company, Tangram Systems Corporation (now known as Tangram Enterprise Solutions), in 1990. We pioneered the micro-to-mainframe communications industry, when the PC was still new. I left Tangram in 1990 to Boole & Babbage in Sunnyvale, CA, the industry's oldest, systems software development house.

Occupation: Real Estate and Development
Spouse: Geneva (Genny) H. Etheridge
Children: Quinn Etheridge, 11, Student; Jim Etheridge, 18, Student
I live in my hometown of Wilson, NC and am engaged in real estate and development. My wife’s name is Genny, and I have two school age children, a daughter Quinn who is 11 years old, and a son Jim who is 8 years old. We enjoy summers in Morehead City. My two children are Carolina fans.

FIELD, MARY LYNN
1701 N. Troy Street #376 A, Arlington, VA 22201
Occupation: Senior Program Officer, UNICEF Technical Support
In 1987, having been on faculty for eight years at UNC-CH I moved into several areas, some old and some new — video production, training and a return to the South Pacific. For three years the highlight was training Peace Corps volunteers in the Marshall Islands, the Solomon Islands, and Truk. In 1990 I joined Family Health International where I set up journalism training in Family Planning and AIDS in Indonesia and Africa. Since 1989 I have worked in GN/AIDS prevention projects funded by HIV/AIDS. This has involved traveling to Africa, Asia and the Caribbean designing country strategies. When not working I’m either in a D.C. park or on the Potomac with Emily the dog — or at one of the many great restaurants in D.C.

The most important thing happened first. Kay and I were married by Bill Peck in the Carolina Inn two months after graduating and we’re celebrating our 25th this year as well. We moved to New Haven where I worked for the Urban Studies Department at Yale, then back to Chapel Hill where Kay became a psychotherapist and I became a lawyer (both temporarily). In 1976 we moved to Atlanta. I practiced law. Kay started Proof of the Pudding, a small gourmet take-out that became the largest caterer in town. In 1982, I started Information America, an on-line information service. Initially it provided access to the Atlanta Courthouse. It is now a nationwide information utility. We took it public in 1992 and sold it to West Publishing in October, 1994. Kay sold “The Proof” in 1986 after Max, our second child was born, our daughter Casey is two years older. Kay is now writing about food and consulting on a variety of culinary projects and I remain the President of Information America. We’ve both been active in professional and civic organizations. For me, the most exciting is the Institute for the Arts and Humanities at Chapel Hill, founded by Ruel Tyson. I have served as Chairman of the Advisory Board for four years now and would love to tell you more about it during the Reunion.

HENLEY, MARTHA S.
21 Thorman Lane, Huntington, NY 11743
Occupation: Attorney
Children: Leigh Henley Sorge, 15, Student; Lindsay Henley Sorge, 10

In Dec. 1968, after being at UNC only one year, I had earned enough credits ahead to be classified as a senior. I flunked out because I didn’t have the 1.9 GPA required. A year later I illegally transferred to NCSU. I found out my friends were in applied math and computers, not “the theoretical math”, and I was even on the Dean’s list again. In 1972 I graduated with a B.S. in Computer Science from NCSU and got a job programming for Christian Children’s Fund in Richmond, VA. After 7 years, I went to the Computer Software Company in assembly language development. After I tried Data Base Analysis with the school board I burned out. I now work at the Daytona Beach Flea Market selling plants and shells.

Occupation: Registered Nurse (RN, MSN)

The thing that best identifies me is horses, and my horse in particular: a gray Arabian I raised from foalhood. I love to paint water colors, and do photography. I have a cute little house under a bunch of trees. To finance all this, I work as an RN. I do a few odds and ends for the community, but mostly mine is a very low-key, quiet life.

Spouse: James J. Higgins
Children: Michael, 22, Health Care Writer/Research (Grad. - Georgetown); Mark, 21, Student (Georgetown); Daniel, 19, Student (Duke); Laura, 17, Student (High School)
After graduation entered UNC-Dental with U.S. Army Scholarship — after graduation spent 11 years in active duty including Hawaii, & Germany. '81 graduated from Marquette Univ. with Orthodontic degree. Came to Raleigh in '85 for private practice. Married for 21 years to Gipsie, two great sons: Kris at UNC 19 yrs. old, & Todd in high school 16 yrs. old. We had a chance to see the world & know that North Carolina is the place to be. I still love to fish & do it often, also coach soccer, & basketball, and really enjoy going back to Chapel Hill every chance I get.

HOFER, DEBORAH CLAIRE (HARRIS)
8250 S. Locust Way, Englewood, CO 80112

Occupation: Vice President, Investor Services, Oppenheimer Mutual Funds

Spouse: Jeffrey Ritter Hofer

I became a Navy wife in December, 1970 and spent several years in exotic locations such as Pensacola, FL and Gulfport, Mississippi! We moved to Denver in 1976 and am now a 'native' Coloradan. I began my career in "Mutualfund land" in 1979. I frequently wish that I had taken at least one business course at UNC! My husband Jeff works for Continental Airlines and we really do go to exotic locales now — Egypt, Europe, Taiwan, Hong Kong, Singapore, Malaysia. Golf and theater are current favorite pastimes.

HOOJ, J. BRUCE
3215 Banbury Way, Durham, NC 27707

Occupation: Attorney, Poe, Hooj & Reinhardt, Durham, NC

Spouse: Lloydette H. Hooj '69

Children: Allison, 1970-1986; Mary Lloyd, 17, Student High School Senior

My most important achievement occurred before I graduated when Lloydette and I married. February, 1995 will be our 26th anniversary. Following graduation I attended law school at Vanderbilt on a Patrick Wilson scholarship, graduating there in 1973. Since that graduation I have practiced law in Durham. In 1986 our oldest daughter Allison, who had hoped to attend Carolina, was killed in an auto accident. It was a great comfort to us that in her memory many of our friends helped us to establish the Allison Hooj Scholarship given annually from her high school, Jordan, to
an outstanding student entering Carolina. Our youngest daughter Mary Lloyd is a senior at Jordan this year.

6444 Corina Ct., Columbia, MD 21044
Occupation: Physician, Assistant Professor, Georgetown Univ. School of Medicine
Spouse: Peter Hooper, III
Children: Brent, 15, Student; Ashley, 11, Student
Immediately after graduating from Carolina I went to grad. school in Ann Arbor, Michigan where I met my husband Peter. In 1973 he took a job as an international economist with the Federal Reserve Board in Washington, D.C. while I began teaching college health courses at Towson State University. I decided to pursue my lifelong dream of being a physician, so I went back to school; seven years and two kids later I emerged as a family doc. After 8 years of private practice, I joined the medical faculty at Georgetown where I remain, a slave to commuting until my kids are old enough to go to UNCG.

“T am about to do a new thing; now it springs forth, do you not perceive it? I will make a way in the wilderness and rivers in the desert.” Isaiah 43:19

After being waylaid on the information super highway for some 20 years, my journey has led me back to care for the seeds of peace and justice that were planted so deeply within my heart 25 years ago at Carolina. I am now the pastor of two small United Methodist churches in Cecil County Maryland, and I am a student (again) nearing the completion of a Masters of Divinity degree at Lancaster Theological Seminary. I continue to give thanks for all that God has graciously given me, especially my family. Picture with me are my two daughters, Kristina and Rachel 3. Without God’s grace my life would be old, but it is new! Peace.

spouse: William L. Earl
children: Christine, 23, Student; Grant, 18, Student; Nan, 14, Student; Rob, 11, Student; Matt, 8, Student

After graduating from Carolina, three years of teaching in Virginia, and the failure of my first marriage, in 1973 I moved to Texas to begin law school. In 1976, I was admitted to the Texas and Florida Bars, remarried, and moved to Florida where I have practiced law for 20 years as Judith Smith Kavanaugh, a partner in Earl, Blank, Kavanaugh & Stotts, P.A., specializing in complex litigation of primarily environmental matters and mass torts. Ten years ago, after the failure of my second marriage, I married Bill Earl (also a lawyer) — and we have definitely "lived happily ever after" with our five children: Christine, graduating from Appalachian State this May; Grant, a freshman at Northeastern University; Nan, 13; Robert, 11; and Matthew, 8.

I have been lucky in my career, serving as the first woman Chairman of the Environmental and Land Use Law Section of the Florida Bar, on the Governor's Environmental Task Force and the Florida Civil Rights Commission. I developed expertise in civil rights and AIDS law arising out of a highly publicized 1987 case representing the Fay family and their three hemophiliac sons with HIV kept out of public school, who were subsequently burned out of their home in Arcadia, FL. I also serve on the Steering Committee for the national class action pending in Chicago against four drug companies for the 10,000 persons with hemophilia infected with AIDS by contaminated blood products.

An extended illness forced me to leave UNC in 1967. While recuperating at home on Long Island, I transferred to Adelphi University and graduated in 1970. During that time, I met my wife, Rosalind, an elementary education major. I went on to earn my Master’s degree in City and Regional Planning in 1972. My first job was manager of the city transit system in Williamsport, Pennsylvania. From there I went on to a regional planning agency where I specialized in traffic and transit planning for the seven counties of N.E. Pennsylvania. After enduring numerous harsh winters, and nearly getting killed in an automobile accident on
In June, 1994, we moved to Sarasota, Florida, where I found a job in the city planning department. We have a modest, but beautifully situated, home just five miles from downtown.

I have been a part time "stringer" journalist for several years. My first book, *Radio's Morning Men,* will be published by McFarland Co. of Jefferson, NC in mid-1995.

My parents relocated to Morganton, NC in 1973, where my father taught at WPCC. They are retired and living in Chapel Hill now.

Recalling memories of our student days is great fun; yet, the reality of life is that we must live in the present. It seems that I'm best able to enjoy some of both by taking our nine year old for walks around campus. As he skips and jumps over the brick sidewalks, I can appreciate his enjoyment of the Chapel Hill of the nineties. At the same time, my recollections of the sixties come to mind, and I try not to bore him too much with my stories of those times past.

We live in Cary, just a thirty minute drive from campus, and I author educational materials and conduct training sessions for GE Capital Mortgage Corporation in Raleigh. Our activities are centered around school, our church and our rather large extended family.

**Fondest memory:** Enjoying the beauty of Chapel Hill during all four seasons of the year.

**Place you miss the most:** All those unique little shops and restaurants we enjoyed that have disappeared one by one over the years.

**Fondest memory:** Drinking beer at the Shack  
**People you would like to see:** All my business school classmates.  
**Place you miss the most:** Carmichael Auditorium  
**Vivid memories of Carolina:** Jubilee 1970 — Kenan Stadium

Twenty-five years ago in June, 1970 I married Ed Marsh whom I met on a blind date 11/12/66 for a Carolina football game. In 1977 we added our son Marcus to our family. Marcus will graduate from Charlotte Country Day School in 1996 — Maybe Carolina for him.  

I have been in counseling since 1971. I worked in the public factor until 1985 when along with 3 other therapists, started a private practice in Charlotte where we have lived since 1974. Ed is Associate General Counsel with Duke Power Company.  

Our family has traveled throughout the U.S. and in Europe. Currently we spend a lot of time in Blowing Rock, NC at our vacation home.  

**Fondest memory:** Watching the Air Force Falcon fly away at halftime, Air Force Football Game 1986 — 1st date with Ed (my husband)

**Life seems to have taken me up and down the east coast since left Carolina. I spent many enjoyable years in Chapel Hill after graduation until moving in 1980 to Ithaca, NY where I worked for Cornell University, and in 1983 to Richmond, VA. My professional career has always involved computer systems development, fortunately using interesting and new technologies for universities, banks, and state and federal governments. My personal life has been full with my son, Mitch, who was born in Chapel Hill in 1978. He has enjoyed numerous visits there attending basketball and golf camps since we moved to Richmond. Fortunately, we have also been able to see football and basketball games on a regular basis. I am finally adjusting to the Dean Dome after all those years seeing games in Carmichael! Mitch is 16, a junior in high school, and busy with activities but golf consumes almost every free moment. He took the sport up about 3 years ago and has progressed quickly. He has been a starter on his high school team each year, and they won the Virginia state championship in October '94. There was quite a lot of excitement since no team from this region of the state has won a championship in 28 years. My family expanded quickly when I married Jonathan Macdonald in 1991. I now have 3 step-children: Byrd, a sophomore at Georgia Tech; Becky, a high school junior and starting center for her school basketball team; and Ben, an 8th grader who plays soccer. Jonathan went to UVA so you can see the ACC is well represented in our family. Watching a football or basketball game takes some real diplomacy.**

**People you would like to see:** Ginny, Mary, Kaye, Linda, Pam, Leslie

MOBLEY, JAMES DAVID

Six weeks after graduation, I married James David Mobley, a 1970
graduate of NCSU. We moved to Ann Arbor, Michigan where I
worked as a Research Associate for Bendix Aerospace. In 1973,
we moved to Richmond, Virginia where I was a Legislative Analyst
with the Legislative Audit and Review Commission. In 1976, we
moved to Raleigh, NC and the following year our oldest daughter,
Diane was born, followed by Sarah in 1980, and Paul in 1984.
During those years, I was a stay-at-home mom and active in our
community and at church. I returned to school in 1991 taking
accounting classes at NCSU. I took and passed the CPA exam in
May, 1994, and am currently employed at Thomas, Judy & Tuck-

I have owned a small stained glass studio for the past 13 years. I specialize in custom work-windows, doors, lamps, mirrors, etc. and thoroughly enjoy it. I kept the studio in my home, so I could be here as the kids were growing up. I have 2 children — John, 23, a recent graduate of NC State in Material Science Engineer. He is getting married this spring. Marcia is 20 and a sophomore at Barton College. My husband was in the Coast Guard for 22 years, so we have lived in Alabama, Texas, NC twice. I have been involved with PTA's and several child abuse prevention programs. Currently, I am on the board (and shelter chairman) of the area womans abuse shelter. It is work that is very important to me.

When I graduated with a degree in business administration, I only
wanted out of school. I had no idea what I wanted to do and
certainly had no idea that I would wind up in academics or in
psychology. Now I can't imagine doing anything else. I have
taught psychology and been involved with institutional research
at the same college for the last sixteen years. In addition to general
psychology, growth and development and abnormal psychology,
I teach a course on the psychology of dreams. I also team-teach
two humanities courses and myth and personal identity and a
survey of great works.

My family (husband Steve and son Ben) and I are now happily settled in Steve’s hometown, Wilson, North Carolina. Our activities center around school, church, and community (Greenfield School, St. Timothy’s Episcopal Church, cub scouts, soccer). My undergraduate and graduate degrees in psychology and education from UNC provided the right background to help me land in a career in educational administration and academic advising at Barton College where I am beginning my third year. I am hoping to spend the remainder of my career in this small college setting. I thoroughly enjoy my efforts to assist adult students in furthering their educational goals.

Occupation: Associate Researcher, Environmental Studies, Center for Climatic Research University of Wisconsin  
Spouse: John P. Stott

I work at the Center for Climatic Research, University of Wisconsin, in the pollen lab. We analyze lake sediments for pollen and other plant and animal microfossils in order to reconstruct changes that have occurred within and around a particular lake throughout its existence. From this evidence we can then infer the climatic regimes which prevailed at different times in a lake's history. We are also interested in how climate affects lake development and function and how this differs from, or is amplified by, human activities. We have worked on lakes and wetlands in several national parks: Voyageur's and Isle Royale in the upper midwest, Cape Cod National Seashore, and Everglades N.P. My husband and I are involved in folk dancing. These days we concentrate mostly on dance traditions from the British Isles — English and Scottish country dancing and Morris dancing — but we met each other 23 years ago at Chapel Hill International Folk Dancers and were just back in Chapel Hill in October to help celebrate the 30th anniversary of the group.

Four years in Chapel Hill were not enough! During the next six I worked for the University as Assistant Dean of Men, got an MPA degree and a Law degree, and met my wife, Jere Gilmore (who came to Chapel Hill after her degree at Columbia). The last nineteen years have been in local government — first with the City of Durham, NC and the past 15 with Wake County, NC with the last ten of those as County Manager. Most volunteer time has been for the University — 11 years on the Board of the General Alumni Association (6 as treasurer), plus a term on the Board of Visitors. The highlight of these 25 years has been my wonderful family (Jere, Andy (12) and Beth (age 10)

My office helps undergrad and grad students find their way
through the system from their first inquiry about the department
to graduation. In the community, I’m on the board of Chapel Hill’s
most successful business, the PTA Thrift Shop and volunteer some
time with the public schools. Previously, I served on the board of
the local ArtsCentre and did volunteer work for the Girl Scouts.
After graduation, I spent some time in New York and DC, working,
among other places, for Ralph Nader and the Muskie for
President campaign. I returned to Chapel Hill in 1973 to work for
the Carolina Repertory Co. The next year I joined the botany
department, which later combined with zoology to form biology.
I earned a master’s degree from “a nearby private university” in
though we had mutual friends and frequented similar places (e.g.,
Harry’s), we have no recollection of each other from college. We
met after both left and returned to Chapel Hill. John runs his own
public relations firm. We are life members of the NC Zoo Society,
The Educational Foundation and the UNC General Alumni
Association. Most of our social life centers around our children’s
activities, Tar Heel sports and other campus events.

YOUNG, CLAIBORNE CLARK, III
1311 Ocean Dr., Emerald Isle, NC  28594
Occupation: Self-employed Dolphin Computer Designs
Spouse: Miriam Martin Young
Children: Claiborne C., 22, Student; Kenneth G., 20, Student
I married Myrna Sept. 70. Worked in accounting in Raleigh before going to ECU to earn an MBA Degree. We then spent 12 years in Washington, NC where I was Corporate Controller for Hackney Industries. We spent a lot of time sailing "Pelican", our 28' Cape Pony Sloop, to Ocracoke and Cape Lookout. Then it was to Durham and several software development jobs before settling in for 4 years as Finance Manager at Classic Food Services. In 1991 we moved into the oceanfront beach cottage we'd built in 79. I now hold a job at home in Computer Graphics. We are active in volunteer work in Marine Mammal Research through the NC Maritime Museum and playing tournament level duplicate bridge.

YOUNG, MIRIAM GUTHRIE (MARTIN)
1311 Ocean Dr., Emerald Isle, NC  27854
Occupation: Technical Research Assistant
Spouse: Claiborne Clark Young, II
Children: Claiborne III, 22, Student; Kenneth G., 20, Student
I and were married in 1970. We located in Raleigh where I worked for an Insurance Agents Association. Claiborne III was born in 1972 and Ken arrived in 1974. We spent 12 years in Washington, NC where I was "volunteer mom" for the boys' activities, and free time was divided between sailing and our beach cottage. We moved to Durham and I returned to the job force working in Academic Affairs at the UNC-CH School of Medicine. In 1991, with both sons in college, we moved to the
beach — I currently work as technical research assistant on Socioeconomics Studies on the North Carolina coast. Duplicate bridge tournaments and volunteer work at the NC Maritime Museum occupy my free time.
